

**COMPANY PROFILE**  
**ARCHISTONE**

## ABOUT US

Archistone was founded in Dubai. As a part of our expansion we have added other brands from Europe, South America & Asia to our portfolio. A showroom and office are located in Al Quoz Industrial Area 03 and can accommodate 50,000 m<sup>2</sup> of supplies at any given moment. To ensure the quality of our products, we only work with leading manufacturers like Atlas Plan, Consentino, Asian Granito, and Casla Quartz. We serve numerous major property companies, regional developers like Emaar, Nakheel, Dubai Properties, Deyaar, Al Fattan Group, Meeras, Wasel ASGC Group, Al Naboodah, Emarat, HLG Contracting, AlFuttaim, etc. UNEC, Aratec Bin Lahej Real Estate, Dubai Contracting Company (DCC) Among others.

## OUR VISION

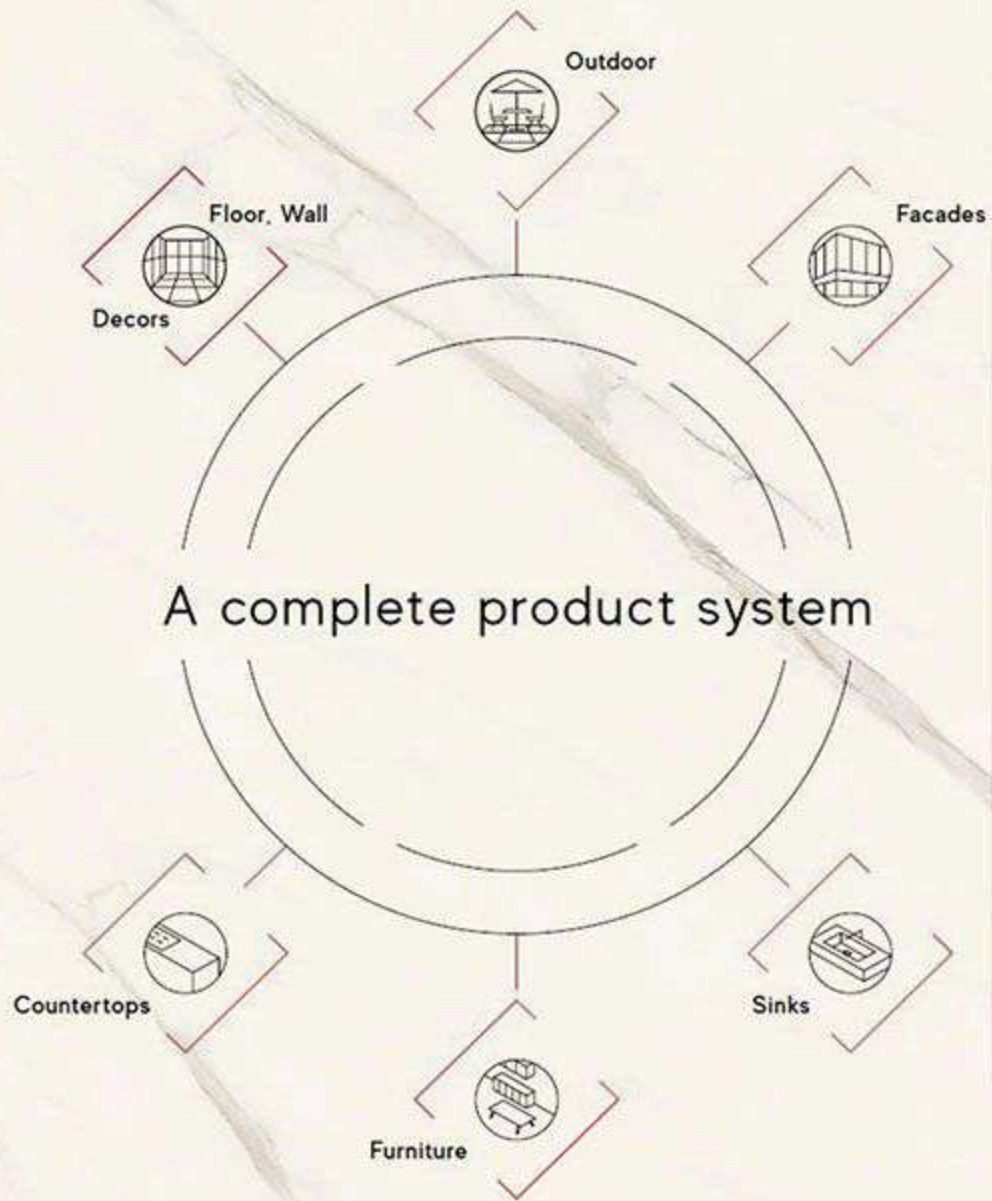

To elevate the material industry standard in the UAE & GCC, serving as a cornerstone where customers are prioritized. Our goal is to provide incomparable service, whether for homes or flagship developments. Our product range is meticulously sourced from prestigious global suppliers.

## OUR MISSION

Ensure complete customer satisfaction by delivering a comprehensive product range featuring premium Quartz and Porcelain Brands.

As a reputable family business, we are widely recognized for exceptional customer care, expertise, and service at both local and national levels. Visit Archistone for inspiration, advice, design ideas, and product selection. We eagerly await the opportunity to welcome you, as our product is our passion.

With Very Best Wishes  
Archistone Team.

# Inspired by choice

---

Our extensive stone selection comprises only the finest cut pieces from premier quarries, ensuring a superior finish and eschewing cheap imitations. Explore a captivating range of colors, from polished blue pearl granite to contemporary green leathered quartz. If your desired stone is not found, we will make diligent efforts to source it for you.

## Sintered stone

---

Sintered stone is a unique kitchen and bathroom countertop material that combines many of the design and appearance positives of favorites like quartz or granite countertops, while eliminating negatives, like water absorption and heat sensitivity. Sintered stone feels like real stone because it is a hybrid of real stone. Learn what sintered stone is and whether a sintered stone countertop might be right for your home. We deal with Atlasplan, Castle Stone, Sapienstone & Dekton.

## Quartz

---

Quartz in its original state is crystallized silicone dioxide, combined with numerous polymers and dashes of pigments. These are the key components in producing engineered worktops. Special effects can be achieved with colored dyes and reflective mirror flecks. We deal with: - Silestone, Compac, Casla Quartz, Kalinga Stone, Caesarstone, Coante Quartz, Quora Quartz, Opal quartz, and Kozo Quartz

## Solid Surface

---

Solid Surface is an acrylic based material made of natural minerals. Just as decorative as natural stone, but with all advantages of a solid surface material. Inspired by nature with a contemporary aesthetic, Supreme Collection Captures the patterns found in natural marble.

## Terrazo

---

Terrazzo is a material used to decorate floors, walls, objects and furniture. It is made with marble, brass or glass elements placed into a coloured liquid ..

## SINTERED STONE

Sintered Stone is a matrix minerals heated from a solid impenetrable mass tht results in a surface that cannot be etched, scratched burned, or stained. So while the market is flooded with the copious quantities of quarried quartz, sintered stones stealthily swing in with a superior set of features.

Sintered Stones a material with extraordinary technical and performance characteristics that make it highly safe, hygienic, easy to clean and maintain and highly resistant to scratches, bending and high breaking loads.

## QUARTZ

A brilliant highly versatile engineered stone which durable, light and non porous. Excitingly quartz can be produced in virtually any color under the sun from azure blue to deep purple, pink or vermilion and because its a composite( a mix of resins as well as pigments.) it maintains all the natural characteristics of stone, while being suted to most applications from kitchen works surface to sink bathrooms, vanities, walls and floors. Prepare for the majestic beauty to your spaces by our collection of engineered quartz. This is a highly dense product and very close to natural granite. Engineered Quartz is resistant to stains, scratches and croack. its is imperevious to het and cold. This supreme material required minimal maintaaince.

# TERRAZZO

---

Terrazzo is a type of flooring and countertop material that is made from a mixture of marble, granite, quartz and other materials that are mixed with a cement with a cement resin binder and then polished to create a smooth and durable surface. Terrazzo has been used for centuries as a building material, and it is known for its durability, versatility and unique appearance.

## SOLID SURFACE

Solid Surfaces, an acrylic-based material made of natural minerals, offer the durability of stone and the flexibility of hardwood. Various colours and natural textures can be processed in curved, seamless shapes, allowing designers' maximum freedom to create limitless designs. Combining a stunning appearance with outstanding practical qualities, Solid surfaces present a modern, refined finish that will enhance any setting. Solid Surface is your design solution.
